

# BOIKARABELO COAL PROJECT

**Client:** Resource Generation SA

**Site/Location:** Waterberg, Limpopo

**Project Period:** November 2008 – Current

## **Project Description:**

RSV ENCO has been appointed to conduct the pre-feasibility study for the development of an open pit mine to support both the export and domestic power generation markets. A proposal for the EPCM work has been given to the client.

The Early Works will start on site in January.

## **The Project Includes:**

- Development of the mining plan
- Design of the supporting infrastructure
- Financial modeling of the project
- Management of the plot plan and overall project schedule

## **The Early Works Include:**

- Establishment of offices
- Establishment of services
- Establishment of the contractors accommodation camp
- Establishment of the electricity supply for construction
- Finalising the earthworks contract
