

MMAMABULA COAL PROJECT

Client: JSW Energy Limited

Site/Location: Matimba, Botswana

Project Period: October 2010 - December 2010

Project Description:

A high level due-diligence study was conducted on the mining, technical, coal processing and infrastructure aspects of Mmamabula Coal Project. The study included an assessment of the overall mine project capital and operating costs as appointed.

The Project Included:

The scope of the high level due-diligence study was to assess the proposed mining project with regard to mining practice and mining methods, production profiles and operational costs. This included the assessment of the coal processing methodologies and product qualities.
