

# THUBELISHA COAL MINE

**Client:** Sasol Mining

**Site/Location:** Secunda, Mpumalanga

**Project Period:** August 2008 – April 2012

## Project Description:

Complete EPCM, including commissioning and hand-over and the development of the complete mine complex.

## The Project Includes:

- The development of shaft systems (service, ventilation and decline shaft)
- The development of materials handling systems (surface 18km overland conveyor, surge bunker and underground conveyors and surge bins)
- All supporting mine infrastructure (offices, workshops, change house, water supply, power supply)

Thubelisha is a 50:50 joint venture with RSV ENCO CONSULTING (Pty) Ltd and GOBA (Pty) Ltd. The 10.6 Mtpa Thubelisha Mine Project will be designed and constructed to accommodate the first production section in January 2012 and build-up to full production with 12 continuous miners and three stonework sections in 2015. The mine will produce coal for both Sasol Synfuels and the export market.
